Global Edge Systems & Wireless Inc.
140, 7260 – 12th Street SE
Calgary, Alberta T2H 2S5

5th July 2010

Dear Robbie:

I would like to thank the Global Edge team in providing Oilflow Solution with a custom SharePoint portal which has revolutionized our data gathering and processing systems. The design and layout of the master pages utilize the same look and feel as our website as “branding” is important to our corporate image.

Our Engineering group is very pleased with the database design, the utilization of InfoPath, and SQL reporting. With this solution, we can provide secure, custom SQL reports to both our executive team and outside clients.

We have found Global Edge extremely easy to work with. The ability to work along side our existing systems was key to us choosing Global Edge as development partners at the onset of this project. We wholly intend to continue to develop our business relationship as our system and requirements grow.

We look forward to implementing our other requirements as our SharePoint requirements evolve and appreciate your proactive approach and commitment to our ongoing requirements.

We would highly recommend your company for anyone seeking SharePoint development. Please feel free to have potential clients call me directly if they require more information.

Yours truly,

Guy Bolton
Engineering Data Manager, Oilflow Solutions Inc.
